

Recriando cenário

Use Image 1 as the base scene for the environment.

Use Image 2 ONLY as a reference for the garment.

TASK:

Remove the garment from Image 1 and replace it with the garment from Image 2.

The garment from Image 2 should appear naturally arranged on the bed, as if it had just been taken out of its packaging. IMPORTANT RULES:

- Preserve the environment from Image 1 exactly
- Preserve the environment exactly
- Preserve the camera angle exactly
- Preserve the lighting exactly
- Preserve the composition exactly
- Preserve the perspective exactly

HAND CONSISTENCY (CRITICAL):

- Keep the exact same hands from Image 1 • Keep the exact same skin tone • Keep the exact same manicure • Keep the exact same accessories (rings, bracelets, watches, if present) • Keep the exact same rings (if present) • Keep the exact same hand position • Keep the exact same arm position • DO NOT generate new hands • DO NOT modify the hands in any way

CLOTHING REPLACEMENT:

- Remove only the clothing from Image 1 • Replace it with the clothing from Image 2 • Replicate the clothing EXACTLY as shown in Image 2 • Same color • Same fabric • Same shape • Same proportions • No redesigning • No creative interpretation

POSITIONING:

- The clothing must occupy approximately the same area where the original clothing was located
- The garment must appear naturally arranged on the bed
- Realistic fabric •

Natural interaction with the bed surface

- Natural gravity and drape

SCENE MAINTENANCE (CRITICAL):

• DO NOT alter the background • DO NOT alter the environment • DO NOT alter furniture (if present) • DO NOT alter environmental details • DO NOT alter the lighting • DO NOT create a new scene

FINAL QUALITY:

• Ultra-photorealistic • Natural shadows • Realistic fabric texture • Real 4K photograph appearance • No AI artifacts

EXCLUSIONS:

• No text • No logos • No watermarks • No filters • No stylization

Remover roupas/texto

Remove all clothing pieces, the model's hands and arms, all text, captions, interface elements, search bar, play button, progress bar, timestamps and any other overlays from the image. Keep only the original environment: the white fluffy rug, the wicker basket, the green plant and the visible wooden floor. Preserve exactly the same top-down camera angle, framing, composition, lighting, colors, texture and image proportions. Naturally reconstruct the rug and background in the areas where the clothes, hands and text were removed, without visible marks, distortions or shadows from the deleted objects. Do not change, move, resize or add anything to the environment. The final image must look like the same scene photographed completely empty.

Colocando a mão no ambiente

Use Image 1 as the BASE scene.

TASK:

Add a pair of feminine hands into the scene, positioned naturally over the surface, matching the same top-down flat lay style and the same hand placement shown in the original composition.

IMPORTANT RULES:

- Preserve the environment from Image 1 exactly
- Preserve the white fluffy rug exactly
- Preserve the wicker basket exactly
- Preserve the green leaf exactly
- Preserve the visible wooden floor exactly
- Preserve the camera angle exactly
- Preserve the lighting exactly
- Preserve the composition exactly
- Preserve the perspective exactly
- Do not modify the background in any way

HAND DETAILS:

- Add two feminine hands with fair/light skin tone
- The hands must look elegant and natural
- The nails must be painted bright red
- Add subtle accessories, such as delicate bracelets
- Add at least one ring
- Add a small minimalist tattoo on one of the hands or wrist area
- The tattoo should be subtle and aesthetic
- The hands should look realistic and proportional

HAND POSITION (CRITICAL):

- The hands must appear in the same lower area of the image
- One hand should be positioned on the lower left side

- One hand should be positioned on the lower right side
- Both hands should be slightly angled inward toward the center
- Fingers should be naturally relaxed and slightly curved
- The pose should feel like the person is about to arrange or present an item in the center
- Keep the hand pose natural, balanced, and symmetrical
- Show part of the forearms, entering from the bottom edges of the frame

SCENE LOCK:

- Do NOT add clothing
- Do NOT add text
- Do NOT add logos
- Do NOT add watermarks
- Do NOT add interface elements
- Do NOT change the decor
- Do NOT create a new environment
- Do NOT stylize the image

FINAL QUALITY:

- Ultra photorealistic
- Natural skin texture
- Realistic red nails
- Realistic jewelry details
- Natural shadows
- Natural integration with the scene
- Looks like a real photograph
- No AI artifacts

Colocar roupa no ambiente

Use Image 1 as the base scene for the environment.

Use Image 2 ONLY as a reference for the clothing.

TASK:

Remove the clothing item from Image 1 and include the clothing item from Image 2.

The clothing from Image 2 must appear naturally arranged within the environment; maintain the size of real clothing.

IMPORTANT RULES:

- Preserve the environment from Image 1 exactly
- Preserve the environment exactly
- Preserve the camera angle exactly
- Preserve the lighting exactly
- Preserve the composition exactly
- Preserve the perspective exactly

HAND CONSISTENCY (CRITICAL):

- Keep the exact same hands from Image 1
- Keep the exact same skin tone
- Keep the exact same manicure
- Keep the exact same accessories (rings, bracelets, watches, if present)
- Keep the exact same rings (if present)
- Keep the exact same hand position
- Keep the exact same arm position
- DO NOT generate new hands
- DO NOT modify the hands in any way

CLOTHING REPLACEMENT:

- Remove only the clothing from Image 1
- Include the clothing from Image 2
- Replicate the clothing EXACTLY as shown in Image 2
- Same color
- Same fabric
- Same shape
- Same proportions

same size • No redesigning • No creative interpretation

POSITIONING:

- The clothing must occupy approximately the same area where the original clothing was located
- The clothing item must appear naturally arranged within the environment
- Realistic fabric

Natural interaction with the environment's surface. • Natural gravity and drape

SCENE MAINTENANCE (CRITICAL):

• Do NOT alter the background • Do NOT alter the environment • Do NOT alter furniture (if present) • Do NOT alter environmental details • Do NOT alter the lighting • Do NOT create a new scene

FINAL QUALITY:

• Ultra-photorealistic • Natural shadows • Realistic fabric texture • 4K real-photo look • No AI artifacts

EXCLUSIONS:

• No text • No logos • No watermarks • No filters • No stylization

Roupa no pacote

Use Image 1 as the BASE scene.

Use Image 2 ONLY as the clothing reference.

TASK:

Replace the clothing item currently inside the transparent package with ALL clothing items shown in Image 2.

IMPORTANT:

Preserve the environment from Image 1 exactly.

Preserve the bed exactly.

Preserve the blanket exactly.

Preserve the camera angle exactly.

Preserve the lighting exactly.

Preserve the composition exactly.

Preserve the perspective exactly.

Preserve the plastic package exactly.

Preserve all hands exactly as they appear in Image 1.

Do not create a new scene.

Do not modify the room.

Do not modify the packaging position.

CLOTHING REPLACEMENT:

Remove only the clothing item currently visible inside the package.

Place ALL clothing items from Image 2 inside the same package.

Replicate the clothing exactly as shown in Image 2.

Same color.

Same fabric.

Same design.

Same print.

Same proportions.

No redesign.

No creative interpretation.

PACKING / FOLDING:

If Image 2 contains more than one clothing item, all pieces must be packed together inside the same transparent package, arranged neatly like a real online fashion order.

Fold the clothing naturally and professionally for e-commerce presentation.

Arrange the pieces so they fit realistically inside the package.

If any item contains a front print, graphic, logo, or important design element, fold and position it so the main front design remains clearly visible through the transparent packaging whenever possible.

Maintain realistic fabric folds.

Maintain realistic packaging reflections.

All garments must remain fully inside the package.

FINAL QUALITY:

Ultra photorealistic.

Natural shadows.

Realistic transparent plastic.

Realistic fabric texture.

Looks like a real product photo.

No AI artifacts.

EXCLUSIONS:

No text.

No logos added.

No watermark.

No filters.

No stylization.

Colocar embalagem do tiktok

Coloque o primeiro seu ambiente e segundo o pacote

Create a realistic overhead product image using two references.

Image A = the empty environment scene with only the model's hands visible.

Image B = the package reference.

Use Image A as the main base for the scene. Preserve the exact same environment, background, surface, framing, lighting, camera angle, hand position style, skin tone, white nails, bracelets, and overall composition.

Add the package from Image B into the model's hands, so the model is naturally holding the package in the scene.

IMPORTANT:

- The package must appear clearly visible in the hands
- Show the FRONT side of the package
- The shipping label must face the camera
- The label should be readable and fully visible from the front
- The package must look naturally held, centered, and well positioned
- The hands must hold the package firmly and realistically from both sides, similar to a natural product presentation
- The package must keep the same black plastic material, proportions, folds, and front label appearance as the reference
- Do not change the package design
- Do not redesign the label
- Do not replace the package with another one

The final image should look like the model is presenting the package for a TikTok Shop product reveal, with the package clearly shown in front view.

Keep the camera completely fixed in a top-down overhead angle.

No camera movement.

No extra objects.

No product outside the package.

No distorted hands.

No extra fingers.

No deformed package.

No label changes.

No background changes.

Final result:

A clean, realistic overhead product image where the model is naturally holding the package with both hands, clearly showing the front side of the package and its label, using the empty environment as the main base. O pacote deve ser pequeno
